Getting started with
eBooks from your library
On tablets and smartphones

Step 1

Install the free OverDrive app from your app store or from app.overdrive.com.
The app is available for Android, iOS (iPhone/iPad/iPod touch), Windows 8,
Windows Phone, Kindle Fire tablets, Kobo tablets, and NOOK tablets.

Step 2

Open the OverDrive app and follow the prompts to sign in or sign up for a free
OverDrive account. If you're under 13, select **I am under 13 years old** instead.

*Note: You won't see these prompts on Windows Phone or in older versions of the OverDrive
app. In those cases, skip this step and move on to step 3.*

Step 3

Use the app's **Add a Library** (or **Get Books**) feature to find and save your library's
OverDrive website.

Step 4

Log into your library's OverDrive website with your library card to see all the eBooks
available at your branch. Tap an available eBook, then tap **Borrow** to borrow it.

Step 5

Once you've borrowed an eBook, you'll have two options for what to do with it. You
can:

- **Download** EPUB eBooks to the OverDrive app.*
- **Read** most eBooks in your browser without downloading them.

**Note: If you're using Windows Phone or an older version of the OverDrive app, you'll need
to authorize your device with an Adobe ID to download EPUB eBooks. It's a one-time, free
process that takes just moments to complete.*

You can also choose an eBook format to download. Please note that once you choose a download format, any other format options for that eBook will disappear (except for the **Read** in your browser option, which is always available).

To download EPUB or PDF eBooks to your computer, install free Adobe Digital Editions (ADE) software and follow the prompts to authorize your computer with a free OverDrive account or Adobe ID. You can then **Download** borrowed eBooks and read them in ADE or use ADE to transfer them to supported eBook readers.
